Powered by a rechargeable lithium-ion battery – the same technology used to power cell phones and laptop computers – the LabelManager® 360D is easy-to-use and eliminates the inconvenience of AA batteries. Print up to nine copies of the same label and prevent repeated work with a nine-label memory and “save text” feature. Enter text quickly and naturally with the familiar computer- style keyboard, and use special function keys for fast access to punctuation marks, currency and other special symbols. Choose from seven font sizes, seven text styles, three font styles and eight boxes plus underline to create custom labels suited for almost any office labeling job.
