The Exhaust Gas

KN95 Mask with Respirator

- Material : non-woven fabric + meltblown fabric
- Certificate : CE, FDA, KN95 Protective Mask Inspection
- Comply with national standard GB2626-2006 Kn95

Characteristics:

- Flat fold design for easy storage
- Up to 95% filtering efficiency
- Exhalation valve for quick dissipation of exhaled air
- Ear-loop design for faster donning and doffing

Features:

- Disposable, breathable, dustproof, hygienic and practical KN95 mask.
- The inner layer of activated carbon can filter harmful gases or odors, with a filtration rate of 95%, a 360-degree three-dimensional breathing space, and provides dust and antibacterial effects.

- Fabric headband without staples which are comfortable to wear in hot and humid conditions
- Nose foam for comfort with spectacles

- Made of high-quality materials, safe, soft and comfortable, reducing skin irritation.
- Elastic rubber bands that absorb sweat and do not fit.
- There is a hidden, anti-fog plastic nose inside the cartilage bridge, which can be adjusted to avoid voids and reduce the inhalation of harmful substances.
- Ultra-thin folded part, lightweight and easy to use.
